PROFESSIONAL SUMMARY

Java Backend Software Engineer with 4+ years of experience developing, integrating, and supporting enterprise applications for banking environments. Hands-on experience with Java, Spring Boot, REST APIs, microservices, batch processing, Azure Service Bus, IBM MQ, SQL, and production support. Applies DDD, Clean Architecture, SOLID, unit testing, and CI/CD to deliver reliable, maintainable solutions. Native Spanish; English B2.

PROFESSIONAL EXPERIENCE

Software Engineer | Tata Consultancy Services | Jun 2023 - Present | Remote, Colombia

- Develop Java and Spring Boot services, REST APIs, and microservices for enterprise banking applications, translating business requirements into technical implementations.
- Integrate asynchronous and downstream workflows through IBM MQ, Azure Service Bus, batch processing, SQL Server, and MySQL.
- Apply DDD, Clean Architecture, SOLID, Git, unit testing, and CI/CD practices across implementation and delivery.
- Provide production support, technical analysis, and regression validation to protect service reliability and business continuity.

Software Engineer | Grupo HDI | Nov 2021 - May 2023 | Remote, Colombia

- Developed Java desktop applications that automated data processing, validation, consolidation, and reporting for banking operations using Excel/TXT files and SQL Server records.
- Built data-access components with JPA/Hibernate and optimized relational SQL queries for application performance.
- Applied unit testing, SOLID, Clean Architecture, and Scrum practices while converting business needs into maintainable solutions.

SELECTED PROJECTS

- **Brazil Derivatives Accrual Engine Integration** | Java, Spring Boot, REST APIs, Batch Processing, Autosys, Shell: Integrated an accrual engine for Brazil swaps and FX NDF regulatory reporting. Processed 1,000+ daily transactions through a two-phase submission/retrieval workflow, file generation, and downstream integration.
- **SADEC - Document & Communication Automation** | Electron, React, Node.js, PDF & Email Automation: Developing a personal Windows desktop product for document preparation, PDF workflows, validation, and spreadsheet-driven bulk email delivery with configurable attachments and execution reports.
- **FAG - Banking Data & Reporting Automation** | Java, Java Swing, SQL Server, Apache POI: Developed a desktop application for a banking entity that consolidated operational files and database records, applied validation workflows, and generated standardized reports.
- **Azure Service Bus to IBM MQ Messaging Integration** | Java, Spring Boot, Azure Service Bus, IBM MQ, Enterprise Messaging: Implemented an enterprise message flow from Azure Service Bus to IBM MQ, enabling reliable delivery between cloud and enterprise messaging platforms. Optimized message processing to sustain high throughput and stable performance under continuous workloads.

TECHNICAL SKILLS

Backend: Java 8+ (Primary), Spring Framework, Spring Boot, RESTful APIs, Microservices, JPA/Hibernate, Batch Processing
Architecture & Integration: DDD, Clean Architecture, SOLID, Design Patterns, IBM MQ, Azure Service Bus
Data, Cloud & Testing: SQL Server, PostgreSQL, MySQL, Microsoft Azure, Docker, JUnit, Unit Testing
Tools & Additional: Git, Maven, CI/CD, Autosys, Shell Scripting, Java Swing, JavaFX, JavaScript, Python; React and Angular (personal projects)
Methods & Languages: Agile, Scrum | Spanish (Native) | English (B2)

EDUCATION & CERTIFICATIONS

- B.Sc. in Software Engineering (coursework completed 2025; degree expected Oct 2026) - Politécnico Grancolombiano
- Technology in Software Development (2023) - Politécnico Internacional
- Full Stack Development (2022) - Oracle Next Education | Scrum Fundamentals Certified (2022)
